EDUCATION

Highschool

Liceul Teoretic "Avram-Iancu"
• Mathematics and Informatics

Bachelor

"Babes Bolyai" University
• Computer Science in German 3rd year

COURSES

- **CS50P**-HarvardX
- **Cisco Networking Academy**
- **CS50AI**-HarvardX
- **CS50Web**-HarvardX
- **CS50 Cyber Security**-HarvardX
- **Google AI** for JavaScript developers with TensorFlow.js
- **AWS**-Cloud Technical Essentials
- **Introduction to Node.js**-LinuxFoundationX
- **Java Spring Boot Certification** - NTT DATA

SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Good listener
- Sales
- Creativity & Innovation

LANGUAGES

- English: Fluent (C1)
- French: Basics (A2)
- German: Fluent (B2)

HOBBIES

- I've played basketball since I was 3, where I learned discipline, teamwork, and the importance of striving for a common goal

DIGITAL SKILLS

- Programming: Java, Python, C++, JavaScript, C#, C, Shell
- Web Development: HTML, CSS, React, Node.js, Django
- Databases: SQL (PostgreSQL, MS-SQL), MongoDB, ChromaDB
- AI/ML: TensorFlow, Scikit-learn, Keras, LLaMA / Ollama, RAG Architectures
- Tools: Docker, Git, Linux, Gradle, Maven, CI/CD
- Other: Shell Scripting (Bash, PowerShell), Cisco Packet Tracer

WORK EXPERIENCE

Working Student NTT DATA Romania 24/11/2025 - 31/03/2026

- AMO (Application management Outsourcing) - First Tier Services
- Developed a small Spring Boot Application
- Introduction to Mainframe and working on the Mainframe

fre SRL Software Development Intern 14/07/2025 - 14/10/2025

- **Full-Stack Development:** Developed a task management app and a file importer (with versioning and threading via Nuxeo API) using React (TypeScript/Vite.js) and Java Spring Boot.
- **Agile & Deployment:** Leveraged AI tools for rapid debugging and deployed containerized solutions using Docker and Tomcat within an Agile workflow.

Hackathon Participant - Web Application Development MHP

Consulting Romania

09/06/2024 - 13/06/2024

- **Project:** A web application designed as a reservation tool for company employees, incorporating AI features to predict desk and room occupancy rates based on time.
- **Role:** Collaborated as part of a team as Full-Stack Developer
- Technologies Used: HTML, JavaScript, CSS, MongoDB, Scikit-learn, logical AI models.
- **Skills Gained:** Gained hands-on experience with web frameworks, databases, AI libraries, and front-end programming languages.

PERSONAL PROJECTS

- **AI-Powered Collaborative Workspace** (Trello Clone): Co-developed a task management app featuring intelligent data retrieval and semantic search, utilizing Chroma DB to handle complex context and unstructured data.
- **HostMe** (Student Housing Mobile App): Built a cross-platform mobile application using Flutter to streamline student accommodations. Integrated Google Cloud Platform (GCP) services, including Google Maps API for location tracking and Google Sign-In for secure authentication.
- **Droply** (Delivery Management System): Co-developed an Object-Oriented Java MVC application to manage logistics, track deliveries, and streamline courier operations.
- **Gamified Learning Workspace** (Startup): Currently building an interactive educational platform featuring a custom reward system designed to drive user engagement and gamify the learning experience.
- **Bachelor's Thesis** - AI Fake News Detector: Actively developing an NLP-based machine learning model (using Python) to detect and classify fake news within Romanian online content.
- **Multiplayer Battleship Game:** Developed a real-time client-server desktop game utilizing TCP Sockets for network communication. Implemented cross-language compatibility using Java, Python, and C#.
